

TWIN-PARQUET

Experience the nature at home.

MANUFACTURED IN NORTH GERMANY

In today's Time, we prioritize different things when it comes to living than we did ten or even twenty years ago. Sustainability and closeness to nature are in focus, as well as the use of high-quality raw materials and a preference for locally sourced products. At the same time, we also desire a lot of individuality and creative expression for our living style.

With GlanPark® Twin-Parquet, you can meet all these demands - uncompromisingly and completely authentic. Sustainability and closeness to nature are ensured by the use of sustainable and high-quality raw materials as well as environmentally-friendly stains and oils from Rubio® Monocoat. Production takes place in our Lüneburg parquet factory in the north of Germany and is done by hand, supported by modern production facilities.

In terms of individual and creative design, you can unfold yourself almost limitlessly because you alone create your dream floor from the Twin-Parquet, in which you determine the individual components such as format, sorting, surface structure, effect, and color.

FROM MANY BUILDING BLOCKS, YOU CREATE YOUR PERFECT OVERALL PICTURE.

We produce your Twin-Parquet exactly according to your specifications. Only when you have chosen all the individual components and combined them to create your desired parquet, our employees in the factory start with the production.

No floor is the same as another in its entirety, no plank has a doppelgänger – rooms can hardly be designed more individually than with the choice of a Twin-Parquet floor. You create a healthy living environment and a characterful base to fulfill your personal living dreams for many years to come.

The refreshing liveliness of the parquet is achieved through the surface you choose. Not only does it vary the appearance of the floor, but also the feeling that accompanies you with every step on it. The respective character is created by brushing with wire or nylon brushes. This highlights and emphasizes the grain patterns of individual woods. The individual processing makes each plank a unique piece.

*A floor that
tells stories.*

Rubio MONOCOAT

At GlanPark®-Parquet, we offer you versatile effects that give your desired floor its own unique character. By choosing a particular effect, you can skillfully adapt your parquet floor to your style and the ambiance of your living spaces, such as by selecting a smoking or aging effect. Here alone, you will find six different shades. Aging effects are also a selected means of giving the floor a lot of liveliness. We achieve these special effects through the use of a non-reactive pre-stain, which is applied simply and without overlap in our factory.

*Perfect in every
aspect of life.*

Rubio MONOCOAT

Trust your intuition and imagination when choosing the color tone. Colors are perceived individually and can be felt much better than defined. And a color that will surround and accompany you for many years over a large area should match your furnishings, style, and personal taste. Forty standard colors for GlanPark®-Parquet provide you with sufficient flexibility and decision-making space.

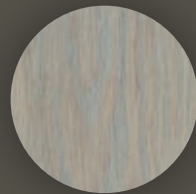

*In any case
The right decision.*
